

**4500 T-TOP**

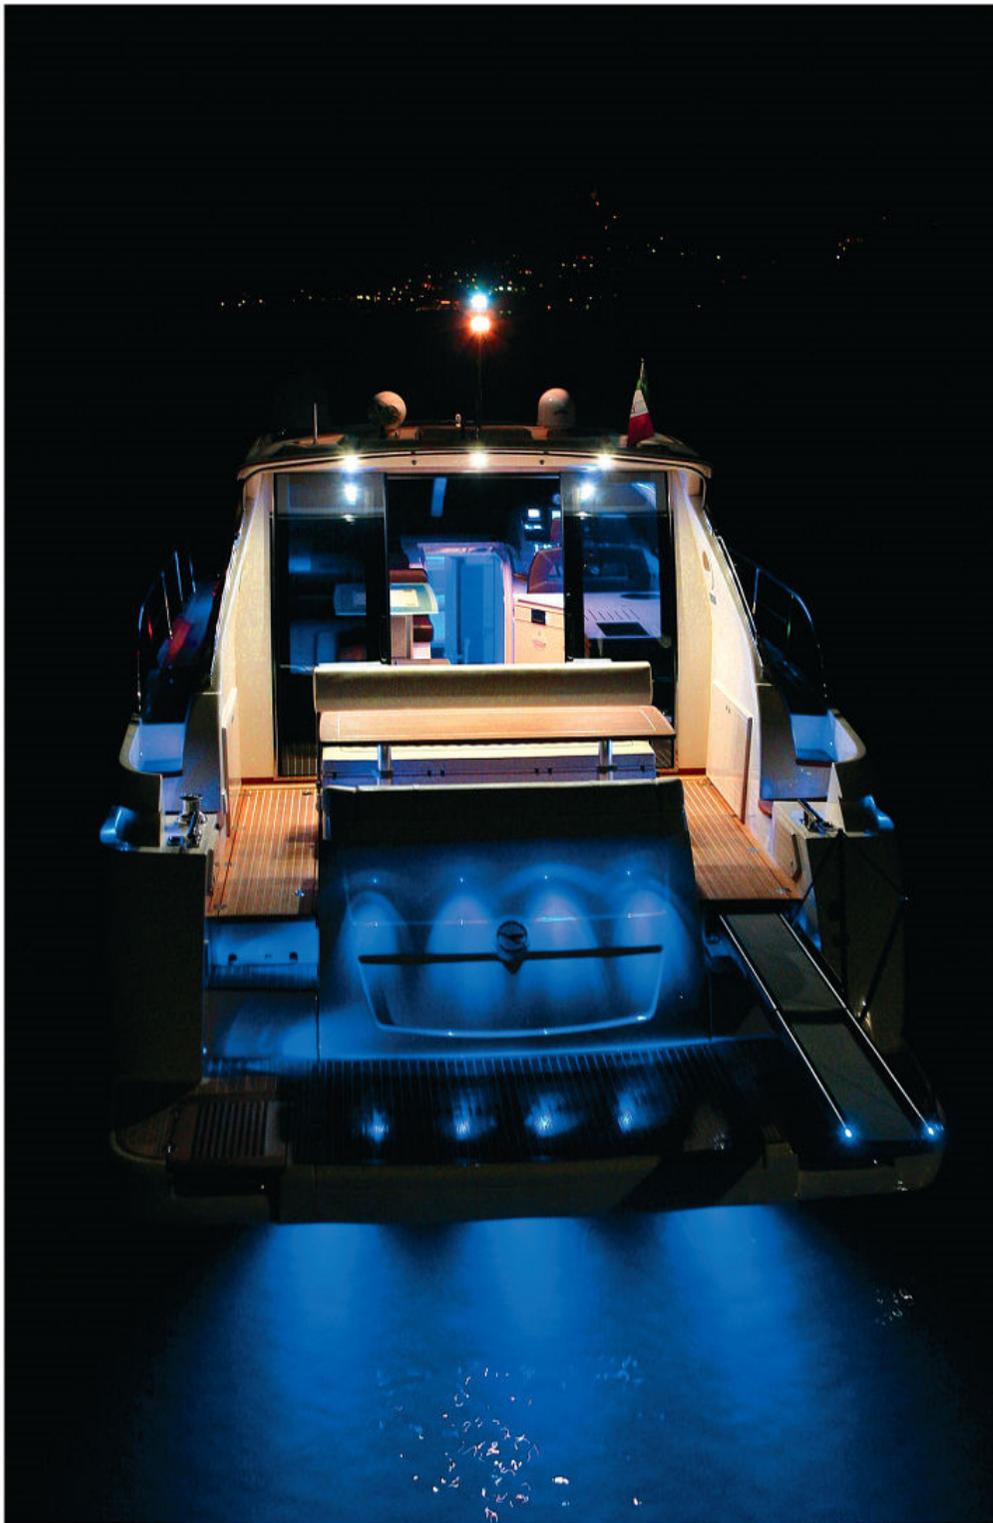

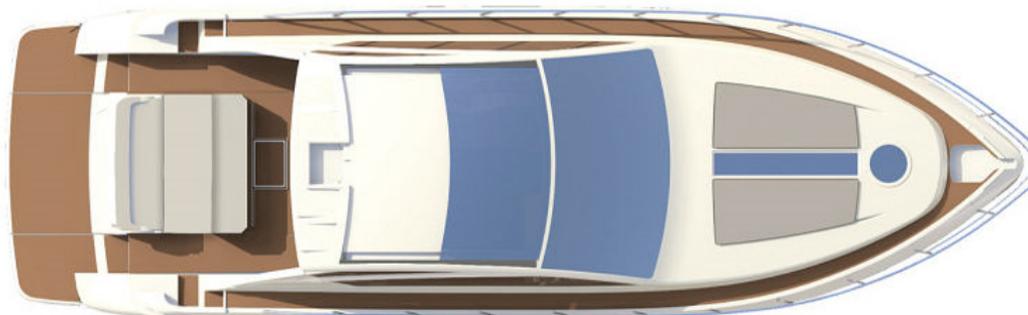

> LAYOUT WITH SHIPOWNER CABIN AT STERN

AIRON 4500 T-Top is the first eco-friendly yacht, built with particular attention to production processes and design. Many efforts were done experimenting green techniques and materials. The use of ecological gelcoats, water-based paints, the use of natural materials and a low impact production cycle, are only an example of this silent research that gives to the 4500 T-Top an added value in respecting the environment in which we all live.
